

TELESCOPIC FOLDING CAMERA COVER KRATON 18X244 CM  
STERILE CAMERA DRAPE

**Product description:**

Elastic-Tipped Camera Cover provides a sterile barrier between cameras and their attachments in the surgical area, used mostly during endoscopy procedures.

To help with monitoring surgical equipment, the video camera cover is made from a clear polyethylene. And for a secure seal around the camera, the cover features an elastic end made of kraton. In addition, for reinforced securement, it comes with a stretchable adhesive tape with dimensions of 1.8 x 20 cm and an extra adhesive tape. This cover has dimensions of 18 x 244 cm.

Our camera cover is designed to help clinicians while they set up for a procedure, as it comes with telescopic folding and single-packed.
