

AGILE MULTIFUNCTION PATIENT TROLLEY THE STRETCHER DEDICATED TO ASSISTANCE, PRECIOUS IN CRITICAL MOMENTS.

Product description:

One Stretcher To Support Every Challenge

Agile is the simple and versatile solution for different uses, both for patient transfer and in critical areas such as emergency rooms.

Its handy two-section structure has easy to fold down ergonomic handles for faster transfer and assistance in emergencies.

The radiotransparent platform facilitates diagnostic operations in critical contexts.

The height of the stretcher is hydraulically adjusted by a front pedal.

The trendelenburg and reverse-trendelenburg positions and the inclination of the backrest guarantee effective support in every phase of assistance.

Antimicrobial Protection

reducing the risk of bacterial contamination from contact with infected surfaces.

Trendelenburg position.

Reverse-trendelenburg position.

The **fold-down handles at head side** allow the operator to have full access to the patient.

Oxygen cylinder holder.

Stretcher with **mattress platform** in **radio-transparent** plastic laminate.

Adjustable cassette for X-ray plates.

Features :

- Two-section mattress platform in radio-transparent plastic laminate
- Trendelenburg and Reverse-trendelenburg
- Two-section mattress platform in radio-transparent plastic laminate
- An X-ray plate cassette can be placed (optional) in the area below the backrest
