

CATHPAX AF AJUSTABLE MOBILE RADIATION PROTECTION CABIN FOR CARDIAC EP PROCEDURES

Product description:

Description :

The model Cathpax® AF Adjustable offers an optimal 2mm lead equivalence radiation protection to the operators during cardiac electrophysiology procedures, while adapting to the occupational habits. It is adapted to all EP procedures: explorations, AF ablations, flutter, supraventricular tachycardia etc...and is totally complementary to 3D navigation systems. Cathpax AF Adjustable is the most standard cabin of the range and represents almost 90% of the installed cabins worldwide.

Why choose Cathpax AF Adjustable ?

- Protection:** unrivalled 2mm lead equivalence radiation protection from the head to the feet
- Comfort:** elimination of orthopaedic troubles thanks to the suppression of lead aprons and respect of working practices
- Guaranteed asepsis:** one single-use sterile kit, Cathkit® AF
- This model is the most standard in the range
