

LOW ACTIVITY VIAL SHIELD Low Activity Vial Shield in 12.5 mm lead glass

Product description:

Use:

For safe storage of vials and handling in connection with filling syringes.

Function:

Developed to combine user-friendly functionality with high safety.

Advantages:

Vial shield in 12.5 mm lead glass. Protects the user against radiation when working with syringes and vials. The transparent glass also provides 360-degree visibility. The top is close-fitting thanks to the use of magnets, and is opened with a light twist. Tungsten is incorporated in the top and bottom to increase safety and cut down on weight. Comes with top and bottom in five different colours. A small range of adapters for vials is included, to ensure different vials fit precisely into the vial shield.

Close-fitting Magnetic Top

The top is close-fitting thanks to the use of magnets, and is opened with a light twist.

Specifications:

Glass thickness 12.5 mm, equivalent to 4 mm of lead

External dimensions: 65x95 mm. Internal dimensions: 30x60 mm

Weight: 1,1 kg

Fits 5-30 ml vials
