

PROFOAM TABLE MAT

Durable table mat for ergonomic and hygienic workflows

Product description:

Conventional X-ray is a place of many challenges. Increasing numbers of patients, the constitution of patients (overweight, age, injuries) and sometimes demanding patient positions lead to physical strain for radiographers and lengthy examination procedures.

Table mats are a key aid here for positioning patients comfortably and in the correct position during the examination.

The various ProFoam Table Mats are perfectly adapted to the respective working environment of a modern radiology department and enable precise, versatile and simple workflows.

Perfectly Hygienic

Smooth, easy-to-disinfect surfaces and welded seams avoid contamination and unnecessary risks of infection.

Ergonomic and Simple Workflows

Design adapted to various radiology environments for easy repositioning and precise positioning of even heavy patients.

- Slideable or anti-slip bottom side
- With or without handles

High Durability

Reduced damages and wear thanks to high quality workmanship with tear-resistant PU material and durable surface.

Handles Option

The handles are welded along the entire length of the mat and widen the mat by approx. 4 cm on each side.

ProFoam Products List

Article Number	Name	Characteristics
1199	ProFoam Table Mat 200x55x3 DS	Anti-slip, without handles
1201	ProFoam Table Mat 200x55x3 DSR	Slideable, without handles
1249	ProFoam Table Mat 200x60x3 DSRG	Slideable, with handles
1251	ProFoam Table Mat 200x70x3 DSRG	Slideable, with handles
