

NIET-MAGNETISCHE MRI-PRISMABRIL (ACHTERAANZICHT)
Nonmagnetic Prism Glasses with view to the rear

Product description:

Antimagnetic 60° prismatic glasses, tested to 3 Tesla, allow the patient lying down to look out of the MR tunnel, e.g. on a relax display or video (an inverted screen display should be used for this).

Ideal for claustrophobic ("claustrophobia") patients and children, viewing direction only to the rear.

- Innovative 60° prismatic glasses with crystal clear optics
- Very good visual acuity, original design
- Universally suitable
- Includes extra soft cleaning cloth and imitation leather case
