

**PARKER AQUAGEL LUBRICATING GEL**  
**Water-soluble lubricating gel for medical and clinical use**

**Product description:**

**Parker Aquagel Lubricating Gel** is a **clear, water-soluble** and **non-irritating** lubricating gel designed for a wide range of **medical and clinical applications**. It is used by hospitals, clinics and healthcare professionals to provide reliable lubrication during examinations and procedures.

Its gentle, **non-greasy** formulation ensures easy application, a smooth consistency and quick cleanup after use. Aquagel lubricating gel is suitable for situations requiring effective lubrication while prioritizing patient comfort.

**Medical use and patient comfort**

Aquagel lubricating gel is intended for use in medical environments, including **clinical examinations, medical procedures** and care situations requiring controlled lubrication. It is recognized for its **consistent performance** and ease of use.

- Clear, water-soluble gel
- Non-irritating
- Non-greasy formula
- Thick, stable consistency

**Safety characteristics**

Aquagel lubricating gel features **bacteriostatic properties**, helping to reduce the risk of bacterial growth during use. It is intended for lubrication and medical use only and **is not a contraceptive**.

**Packaging**

Parker Aquagel lubricating gel is available in different formats to meet the needs of low- and high-volume medical environments.
