

SEMI-AUTOMATIC BIOPSY GUN Biopsy gun

Product description:

The semi-automatic gun is a sterile biopsy instrument designed for soft tissue biopsy.

The stainless steel needle is echogenic, making it easy to locate on ultrasound images. It can be advanced either 1 or 2 cm and has centimetre markings for precise adjustment of penetration depth. The needle tip is designed to facilitate sampling while remaining atraumatic for the patient.

The device is fitted with a lightweight handle incorporating a push button and a gripping system to make it easy to use the gun with just one hand.

Adjustable 10mm or 20mm sampling notch, distinct colours for easy identification of the gauge used.

This is a single-use device, available in various gauges and lengths.

Gauge: 14 cm, 16 cm, 18 cm, 20 cm
AdB length: 10 cm, 15 cm, 20 cm, 25 cm
AdB coaxial length: 5 cm, 10 cm, 15 cm
With or without coaxial: Yes, No

MEDICAL EQUIPMENT, ACCESSORIES AND CONSUMABLES FOR MEDICAL IMAGING.
