

SPINE POSITIONING SYSTEM II

Essential support for spinal procedures and improved imaging accuracy

Product description:

The Spine Positioning System II is a key component of pain management suites. It enhances the visualization of necessary anatomic landmarks for safe and precise spinal injections. The system is designed to improve access to the cervical, thoracic, and lumbar spine— including the cervicothoracic junction—regardless of the patient's body habitus.

Main Features	
Use	Spinal injection and pain management procedures
Optimized visualization	Clear view of cervical, thoracic, and lumbar landmarks
Patient adaptability	Effective for all body types
Stability	Provides secure and stable positioning
Comfort	Increases patient comfort during procedures
Transport	Delivered with a portable case for clean transport and storage
Compliance	FDA listed, CE marked

Reference: OAK81819
