

STRAPS FOR LEGHOLDER RX® LEG POSITIONER

Short and long Velcro straps for quick and stable attachment.

Product description:

The Legholder RX® straps are specially designed to ensure quick, stable, and secure attachment of the leg positioner to operating tables. Thanks to their durable Velcro fastening system, they allow for simple and reliable installation under any conditions.

Two versions are available depending on your operating table setup:

- **Short (S):** Ideal for most operating tables with separate and independently movable leg sections on the right and left. Advantage: simpler and more stable assembly while preserving the movement of individual sections. (Article no. LRX2020-10)
- **Long (L):** Also suitable for operating tables without separate leg sections.
