

MRI BAG VALVE MASK

MRI manual resuscitator with safety valve and masks — available for adults, children, and newborns

Product description:

Designed for MRI compatibility up to 3 Tesla, the **MRI manual resuscitator** ensures efficient emergency ventilation for adults, children, and newborns. Each model is **latex-free**, **reusable**, **gas sterilizable**, and **ISO compliant**.

Featuring an **anatomical grip**, it comes with a **pressure limit valve**, **oxygen reservoir**, and **oxygen tube**. Each set includes **size-appropriate masks** for the intended patient group.

Available in three bag volumes:

- 1500 ml for adults (masks size 3 and 5)
- 550 ml for children (mask size 3)
- 280 ml for newborns (masks size 0 and 1)

Individually packed. CE class 2a certified.

Taille injecteur IRM: Adult (1500 ml), Child (550 ml), Newborn (280 ml)
