Product description:

MRI O₂ Emergency Kit - portable, compact, and ready to use

Designed to ensure patient safety during MRI procedures, the **MRI O₂ Emergency Kit** enables quick and effective oxygen delivery in cases of hypoxia or respiratory distress. Lightweight, compact and ready to use in just three steps, it's ideal for immediate response in MRI environments.

The set includes a high-quality Ambu resuscitator (reusable or disposable), an unfilled aluminium oxygen cylinder (400 L), a 2-meter spiral hose and a medical pressure regulator with adjustable flow. Available in adult/child or infant/toddler versions (5 mask sizes included).

- MRI-compatible (no magnetic components)
- Quick setup: ready in 3 steps
- Easy transport with compact case (6 kg)
- Mobile emergency oxygen therapy for hospitals and clinics

Kit urgence oxygène: Standard – Children & Adults, Disposable – Children & Adults, Reusable Mini – Infants & Toddlers, Disposable Mini – Infants & Toddlers

MEDICAL EQUIPMENT, ACCESSORIES AND CONSUMABLES FOR MEDICAL IMAGING.
