

FFP2 MEDICAL MASK MRI COMPATIBLE - PACK OF 10
FFP2 Type IIR protective mask for MRI examinations - Enhanced comfort

Product description:

The FFP2 MRI-compatible medical mask is designed to provide high-level respiratory protection during magnetic resonance imaging examinations and sensitive clinical procedures. Certified Type IIR, it ensures effective filtration while offering optimal comfort for patients and healthcare professionals.

Respiratory protection for medical environments

Thanks to its high-performance filtration system, this mask provides FFP2 protection with 95% filtration efficiency against fine particles down to 0.6 µm. It is perfectly suited for hospital environments and MRI examinations.

- Medical certification Type IIR
- FFP2 protection - 95% filtration
- MRI system compatible
- High-performance folding filter
- Reduced breathing resistance

Enhanced comfort and ergonomic fit

The anatomical shape naturally adapts to facial contours, ensuring secure positioning. Soft and breathable materials allow comfortable wear even during prolonged use.

- Foam nose pad for increased comfort
- Skin-friendly inner fleece layer
- Adjustable elastic straps
- Even pressure distribution
- Clip fastening system

Practical and hygienic design

The mask features a robust support grid that maintains its shape during use. It is individually packaged in PVC-free

wrapping to guarantee optimal hygiene.

- Rigid support grid
- Neck-hanging option during breaks
- PVC-free individual packaging
- Single-use design

Technical specifications

- Type: FFP2 Type IIR medical mask
- Compatibility: MRI systems
- Filtration: 95% ($\leq 0.6 \mu\text{m}$)
- Packaging: Pack of 10 masks
- Use: Professional medical use

The MRI-compatible FFP2 mask is a reliable solution for healthcare facilities seeking high-performance, comfortable and compliant protective equipment.

Size: Small-medium, Large
