

STERILE ENDOCAVITARY ULTRASOUND PROBE COVER KRYPSTAL COVER (GYN COVER) Sterile non-lubricated latex cover for endocavitary ultrasound

Product description:

The **Krystal Cover (Gyn Cover)** is a **sterile latex probe cover** designed for **endocavitary ultrasound probes**. Its smooth surface and **high elasticity** allow it to adapt easily to probes of various diameters. It is suitable for **invasive gynecological procedures**.

Each probe cover is supplied in a **sterile, heat-sealed individual package**. The **rolled folding** enables quick and easy application in clinical environments. These latex covers are designed to ensure **optimal ultrasound image quality without artifacts**.

Key features

- Sterile probe cover for endocavitary ultrasound probes
- High-resistance latex material
- Non-lubricated
- Sterile, individually sealed packaging
- Dimensions: 3,5 × 20 cm
- Packaging: box of 100 probe covers

The use of a probe cover does not replace **proper disinfection in accordance with current best practices**.

Size: 3,5 x 20 cm

MEDICAL EQUIPMENT, ACCESSORIES AND CONSUMABLES FOR MEDICAL IMAGING.
