

LATEX STERILE EXAMINATION GLOVES – POWDER-FREE
Sterile latex examination gloves with long cuff

Product description:

Sterile powder-free latex examination gloves are designed for medical procedures requiring **high tactile sensitivity** and reliable protection. Widely used across medical specialties, they ensure precise handling and patient safety.

The **Polymer Coated** treatment improves donning comfort and glove glide while preventing reactions caused by excessive chlorination. This finish supports **efficient and comfortable preparation** during sterile procedures.

The **slightly textured surface** provides a smoother feel, facilitating instrument handling and reducing hand fatigue during prolonged use.

- **Sterile, powder-free latex**
- **Polymer Coated** finish for enhanced glide
- **Long cuff (300 mm)** for extended protection
- **Straight cuff edge** for secure fit
- **Double sterile packaging per pair**

These gloves are suitable for **sterile examinations and medical procedures**, combining comfort, safety and precision.

Packaging

Supplied in a **dispenser box: 50 pairs** (i.e. **100 ambidextrous gloves**).
