

STERILE POWDERED LATEX EXAMINATION GLOVES
Sterile latex gloves for medical procedures

Product description:

Sterile powdered latex examination gloves are designed for medical procedures requiring a **sterile environment**. They provide effective hand protection while ensuring user comfort thanks to their powdered surface.

Made of latex, these gloves offer **good mechanical resistance** and allow a **secure grip on medical instruments**. Their ambidextrous design makes them suitable for everyday clinical use.

- **Sterile**
- **Powdered**
- **Hypoallergenic**
- **Ambidextrous**

Available in several sizes to suit the user's hand morphology:

- Small (6.5)
- Medium (7.5)
- Large (8.5)

Packaging

Supplied in a **dispenser box: 50 pairs** (i.e. **100 ambidextrous gloves**).
