

FLEXYLON® FINESSIS ZERO SURGICAL GLOVES
Sterile synthetic surgical gloves, powder-free and latex-free

Product description:

The **FLEXYLON® Finessis Zero surgical gloves** are sterile synthetic gloves designed for **general surgery**. Their **latex-free, powder-free and accelerator-free** design helps reduce the risk of sensitisation while ensuring a high level of protection in the operating theatre.

The **micro-textured surface** improves instrument grip, even in wet conditions. The **anatomical shape** combined with a **280 mm long cuff** contributes to glove stability and precise surgical handling.

- **Sterile synthetic surgical gloves**
- **Latex-free, powder-free, accelerator-free**
- **Micro-textured surface for improved grip**
- **Anatomical shape with 280 mm cuff**
- **AQL 0.1 - Class IIa medical device**

FLEXYLON® Finessis Zero gloves meet the safety and performance requirements expected for surgical procedures, without being listed in the LPPR.
