

FITGUARD ALPHA X-RAY PROTECTIVE GLASSES

Front protection 0.75 mm Pb and lateral protection 0.50 mm Pb - non-prescription overglasses

**Product description:**

The **Fitguard Alpha X-ray protective glasses** are designed to effectively protect the eyes of healthcare professionals exposed to **ionising radiation** during fluoroscopy-guided procedures. They provide a **lead equivalent of 0.75 mm Pb at the front** and **0.50 mm Pb at the sides**, covering the main areas of ocular exposure.

Designed **without optical correction**, these glasses can also be used as **overglasses**, making them suitable for users wearing prescription eyewear. Their wraparound frame ensures good stability while maintaining **comfortable wear during extended use**.

As **personal protective equipment (PPE)**, Fitguard Alpha glasses are intended for personnel present in examination rooms or operating theatres during medical procedures involving X-rays. Their use is recommended to **reduce eye exposure to scattered radiation**.

**Main features**

- **Front protection:** 0.75 mm Pb
- **Lateral protection:** 0.50 mm Pb
- **Non-prescription** - usable as overglasses
- **Personal protective equipment (PPE)**
- **Colour:** matte black
- **Weight:** 91 g
