

SONY UP-991AD HYBRID PRINTER
A4 medical thermal printer - black and white, analog and digital inputs

Product description:

The **SONY UP-991AD hybrid printer** is an A4 medical thermal printer designed for **fast, high-quality printing of radiological and ultrasound images**. Its compatibility with both **analog and digital inputs** allows seamless integration with a wide range of medical imaging systems.

Thanks to its **compact design**, the printer fits easily into clinical and operating room environments, including **medical carts**. **Front-panel controls** and a **backlit LCD display** ensure intuitive operation and quick access to settings.

The UP-991AD enhances workflow flexibility by allowing a **USB storage device** to be connected for direct saving of captured images, in **black and white or colour**. It supports printing on **blue-tinted transparent film** as well as **thermal paper**.

Multiple **print modes** are available, including landscape orientation, multi-image printing and panoramic printing. The system features **automatic media type detection** and **automatic cutting at the end of printing**, improving efficiency.

The printer delivers **photographic-quality output** with a **resolution of 325 dpi** and a **printing time of approximately 8 seconds** in standard mode.

Compatible media: UPP-210HD, UPP-210SE, UPT-210BL.
