

## SANDBAG – HYGIENIC PATIENT POSITIONING BAG Radiolucent positioning bag with hygienic PU surface

### Product description:

**Sandbags** are patient positioning bags designed to provide stable and comfortable support during radiological examinations. Developed to meet increasing hygiene and disinfection requirements, they are perfectly suited for intensive medical use.

Each sandbag is **sealed in a durable polyurethane (PU) foil**, ensuring optimal hygiene. The smooth, impermeable surface allows **easy cleaning without residue** and withstands **frequent use of strong disinfectants**, enhancing patient safety and comfort.

Thanks to their **high-quality, tear-resistant construction**, sandbags maintain durability even under regular disinfection. Their versatile design enables **efficient and straightforward handling** across numerous imaging modalities and patient positions.

Available in various sizes and weights, sandbags can be used **inside or outside the field of view** during all radiological procedures.

### Main features:

- Hygienic medical positioning bag
- Waterproof and disinfectant-resistant PU cover
- High durability and tear resistance
- Radiolucent
- Versatile use in radiology

### Available sizes and weights:

- 40 × 20 cm – 3 kg
- 30 × 20 cm – 2 kg
- 24 × 18 cm – 1.25 kg

Size: 40 x 20 cm, 3kg, 30 x 20 cm, 2kg, 24 x 18 cm, 1,25kg
