

## ANTI-RADIATION PROTECTIVE LEADED GLASSES WITH INTEGRATED DOSIMETER Association with Dosilab - dosiEYE

### Product description:

Radiation protection and eye lensdosemetry redefined. The anti-radiation protective leaded glasses protects the user's eyes from scattered radiation from all angles of incidence and at the same time offers the possibility to combine dosimetry and X-Ray protective glasses.

- Gap-free radiation protection from the nose to the cheekbones
- World novelty: Patented dosemeter connection on the left, right or on both sides.
- Optical corrections are available as single-vision, bifocal, and progressive lenses
- Maximum wearing comfort through individual adjustment options
- Easy cleaning and a high degree of chemical resistance (resistance to disinfectants)

### Dosemetry & X-Ray Protective Glasses
