APD TABLE-TOP UNIT - BAT-IV
Attribution station of 1 or 4 dosimeters

Product description:

APD Table-top unit

• Table-top units with 1 or 4 wells
• A compact design
• USB connection to your PC

When only a few APDs are needed and a PC is available, the table-top units are a cost effective alternative to the stand-alone APD-stations. A table-top attribution unit connects to a PC via USB.

On the PC, the dosiLINK application lets the user attribute dosimeters in an identical way as on the APD-station.

Characteristics

- Associated software : dosiLIGHT

Number of slots: 1 dosiMETER, 4 dosiMETERs

Reference: DOSI0008
