

PROBELT 200 - PATIENT POSITIONING BELT FOR CT AND IRM Patient positioning belt for CT and IRM

Product description:

ProBelt is the first completely hook-and-loop-free belt system and allows a perfectly hygienic fixation of patients on the CT. The ProBelt system is compatible with the CT tables of all common equipment manufacturers using different rail adapters.

ProBelt

200 R2 for GE Art. 1170

200 R3 for Siemens and Philips Art. 1171 200

T5 for Canon Art. 1172

ProBelts are inserted into the designated table rails and get closed by using the eyelet in order to immobilize the patient.
