

PROFOAM - POSITIONING WEDGE 45°
Perfectly hygienic foam position aids

Product description:

Due to the spread of MRSA and other germs, positioning aids are being investigated more and more carefully and must also withstand the frequent use of strong disinfectants.

In order to meet these challenges, we have developed the new ProFoam positioning aids. The ProFoam positioning aids are made of a dimensionally stable foam material and are welded into a durable polyurethane foil.

FEATURES :

The ProFoam positioning aids are made of a dimensionally stable foam material and are welded into a durable polyurethane foil.

This makes the ProFoam positioning aids perfectly hygienic:

- Durable surface even with 90% alcohol disinfection
- Welded seams also absolutely tight in the cleaning bath

ADVANTAGES :

- Perfectly Hygienic : Durable surface despite aggressive disinfectants. Sealed-seams guarantee, absolute air- and liquid-tightness.
- Versatile fields of applications (e.g. CT, MRI, X.-Ray) Radiolucent from 70-140 kV
- Stable positioning in exact positions/angles
- High durability, long lifetime due to tear resistant materials

Profoam 45° Size: 18 x 11 x 5 cm (Small), 18 x 25 x 12 cm (Short), 36 x 25 x 12 cm (Medium), 60 x 25 x 12 cm (Long)
