

CARESTREAM - DRYVIEW DVB+ Carestream Laser Imaging Film

Product description:

CARESTREAM DRYVIEW DVB+ Laser Imaging Film offers distinct advantages that are clear to see. Combining dry laser imaging with slightly bluer, more pleasing blue/black tones, DVB+ Film improves image visibility in low density and higher density regions alike. It also lasts longer, handles more efficiently and maximizes your film supply inventory. For most imagers a simple software upgrade is all it takes to seamlessly transition to DVE Film while continuing to use your current film supply.
