

CARESTREAM - DRYVIEW DVM+ Carestream Mammography Laser Imaging Film DVM+

Product description:

The precision and reliability you expect from CARESTREAM DRYVIEW Laser Imaging Film is now available in a new mammography-quality film. Carestream DRYVIEW DVM+ Mammography provides exceptional mammography imaging for quality diagnoses. The silver within the film results in highly consistent image contrast and precise, high-quality imaging. Using the superior $D_{max} > 4.0$ printing preferred for mammography imaging, DVM+ produces exceptional mammography images to empower your staff to make confident diagnoses and provide extraordinary patient care.

Precise imaging for exceptional patient care.

DRYVIEW DVM+ Mammography Film features $D_{max} > 4.0$ printing, the industry preference for mammography. Distinct black tone and wide dynamic range, ensures clear, crisp diagnostic images. Proven support for CR, DR and FFDM mammography applications.

Easy to use—Intuitive film loading makes DRYVIEW DVM+ Film the first choice for busy mammography departments.

Note: The 28 x 35 cm format now allows you to obtain two images per film.
