

## MRI BABY EARMUFFS FROM 0 TO 18 MONTHS Em's 4 Bubs Earmuffs use an adjustable headband.

### Product description:

Em's 4 Bubs Earmuffs use an adjustable headband to hold the ear muffs in place, preventing uneven pressure from being exerted on the sides of your baby's head like traditional ear muffs.

Recommended for newborns to 18 months, these are the FIRST noise canceling headphones in the world designed specifically for babies!

All the bands are interchangeable (standard black color).

Small and light: specially designed for baby's little ears

Patented headband design: provides hearing protection without putting excessive pressure on the skull
