

MRI PNEUMATIC HEADPHONE

Pneumatic headphone connects to MRI stereo sound systems

Product description:

Reduces gradient pounding sounds

Enables patients to hear MRI music during their MRI scan

- Ear muff headphone completely surrounds the ear and the eartip directs music into each ear
- Outer shell, inner foam and foam eartips provide approximately 49 dB of noise reduction
- Helps patients to hear music during the MRI scans by reducing the gradient sounds from the MRI scanner
- Comfortable for adults and children to wear during the MRI scan
- Foam eartips may be replaced for hygienic use between multiple patients
- Sanitary stretch covers available
- The headphone mates with tubing having a 0,95 cm outer diameter or 0,6 cm inner diameter
- All plastic construction
- Pneumatic headphone is inert to the MRI scan and is completely NON-FERROUS
- These headphones are compatible with almost all MRI music systems
