

POSISAFE® W TYPE A - SHIELDED TUNGSTEN TRANSPORT CONTAINER Screwed-on locking handle

LEMERPAK

Product description:

- Flexible shielding upon request

The Posisafe® W Type A shielded transport allows safe transportation and storage of radioactive substances.

Posisafe® is composed by a tungsten shielded container and an overpack meeting IAEA regulations and safety standards for safe transport of radioactive material.

The Posisafe® guarantees a full biological protection of the operator and the environment from contamination and exposition to ionising radiations.

Another version of Posisafe®, Posisafe® Pb 30 Type A offers a 30 mm lead shielding. The Posisafe range meet your needs depending on the activity of the radioactives substances you're manipulating.

Posisafe Overpack: W20 - Container only - Ø 94 x H 161 mm, W30 - Container only - Ø 118 x H 206 mm, W20 - Container + overpack - Ø 94 x H 161 mm, W30 - Container + overpack - Ø 118 x H 206 mm
