

LOWER BODY LEADED PROTECTION Modular leaded shield lower body

Product description:

The modular design of the lower body protection: All components are interchangeable to give you the option to decide what amount of protection is needed and from which side of the table (possible mounting position: left or right). An accessory rail has been built into the shield to give the needed space for table and C-Arm controls, as well as other required equipment.

- Lead equivalent of Pb 0.50 mm for all shields/panels
- Up to max. 1620 mm width
- Additional front accessory rail to match your table profile rail
- Optional wall mounts for storage
- Available for the following table profile rails: 7.7 x 25 mm (GE), 9 x 25 mm (Toshiba/Canon) und 10 x 25 mm (Philips/Siemens)

Largest Possible Flexibility – Maximum Protection

With the lower body leaded protection, a new generation of table mounted shields has been created to offer flexibility with maximum protection. The modular design of the lower body protection: All components are interchangeable to give you the option to decide what amount of protection is needed and from which side of the table (possible mounting position: left or right).

The new large X-ray protective lower body table shield does not only protect the doctor, but the assistant as well. An accessory rail has been built into the shield to give the needed space for table and C-Arm controls, as well as other required equipment.
