

X-RAY LEADED TABLE SHIELD BV5 X-ray table shield BV5

Product description:

Consisting of basic elements that you juxtapose until you get the desired protection, these modular flaps offer you an economical solution by adapting to all the tables of the operating room without heavy fixation.

Our flexible table mounted lower body shields are made up of pieces of protective curtain overlapping. Waterproof PVC coating for easy cleaning.

Our standard protection is 0.50mm Lead and a height of 70cm, however, we can provide any other configuration. These shields can be equipped with an optional RFID tag. Several models are available depending on the type of fixation.

Characteristics

- Each basic element is attached to the rails of the table by stainless steel medical hooks.
