

MULTIPAD - PATIENT POSITIONNING Positioning pads for MRI and CT

Product description:

Pearltec products represent the new “Standard of Care” when it comes to the placement, positioning and fixation of patients during MR and CT examinations, with regard to image quality, handling, hygiene and patient comfort.

The flexible and universally applicable MULTIPAD family of products enables optimum patient placement, positioning and fixation when it comes to examinations using head and extremity coils.

Characteristics

- Multipad Standard

Thanks to its dimensions of 17 x 6 cm and the variable thickness of 2 to 5 cm, the MULTIPAD Standard is particularly suitable for situations where there are no specific restrictions.

- Multipad Plus

Thanks to its dimensions of 17 x 11 cm and the variable thickness of 2 to 5 cm, the MULTIPAD Plus is particularly suitable to fill larger gaps.

- Multipad Slim

Thanks to its dimensions of 17 x 9 cm and the variable thickness of 1 to 3 cm, the MULTIPAD Slim is particularly suitable for situations where space is limited.

- Multipad Cover

The covers for the MULTIPAD product family form an integral component for a hygienic and patient friendly application.

Multipad: Standard, Plus, Slim, Cover
