

KRYSTAL COVER – STERILE LATEX-FREE SUPERFICIAL PROBE COVER

Sterile protection for superficial ultrasound probes - polyurethane or polyethylene

Product description:

Krystal Cover probe covers are designed to provide **effective protection for superficial ultrasound probes** during ultrasound-guided procedures. They help limit probe exposure to **bodily contaminants** and facilitate **cleaning and disinfection** of the equipment after use.

Manufactured according to **EDM quality standards**, Krystal Cover probe covers have been used and approved by **healthcare professionals in Europe, the United States and internationally** for over 30 years.

The probe covers are available as **sterile procedure kits** which, depending on the reference, include the accessories required for the procedure, ensuring **ease of use** and compliance with aseptic protocols.

Key benefits

- **Easy to use:** sterile covers with telescopic folding for quick, single-operator application
- **Artifact-free imaging:** 3D tip design prevents folds or air bubbles between the probe and the target area
- **Latex-free:** 100% synthetic materials, eliminating allergy risks
- **High resistance:** reliable protection for both patient and practitioner
- **Secure sealing:** adhesive bands ensure a tight and stable fit

Krystal Cover probe covers reflect the positioning of the **Krystal** brand, combining **high quality, safety and cost control**, while meeting the requirements of radiology, anesthesia and vascular access procedures.

The use of a probe cover **does not replace proper disinfection in accordance with good practice guidelines**.
