

PARKER SPECTRA 360 GEL
Gel for electrodes

Product description:

The only salt-free and chloride-free electrically conductive gel, recommended for all electromedical procedures, except defibrillation. Salt-free characteristics make it particularly suitable for long-term applications. Spectra 360 differs significantly from all other electrically conductive media; it works by wetting the skin, thereby reducing skin resistance.

Characteristics

- 12 x 250 gr
- Product of choice for ECG, TENS, monitoring and pediatrics
- Non-irritating
- bacteriostatic
- Salt-free
- no sodium ion transfer
- Product of choice for conductive rubber/carbon electrodes
- Not recommended for defibrillation
