

**PARKER AQUASONIC 100 STERILE GEL - SINGLE-USE SACHETS**  
**Sterile contact gel for ultrasound and invasive procedures**

**Product description:**

The **Parker Aquasonic 100 sterile gel** is a viscous contact gel intended for ultrasound examinations and medical procedures requiring a sterile environment. It is supplied in single-use sachets for diagnostic and therapeutic applications using ultrasound.

The **thermosealed sterile sachet** presentation helps reduce the risk of cross-contamination during invasive procedures. Each sachet contains a controlled amount of gel, allowing precise application without excess.

**Gel characteristics**

- **Sterile** gel in single-use sachets
- **Colourless** appearance
- **Fragrance-free**
- Suitable for **invasive procedures**

**Formulation**

The Aquasonic 100 formulation is **fully water-soluble** and water-based. It is designed not to stain and to protect clothing and medical equipment. Its **hypoallergenic** composition allows use on sensitive skin without irritation during application.

- **Non-greasy**
- **Non-spermicidal**
- **Formaldehyde-free**
- Compatible with a wide range of ultrasound frequencies

**Packaging**

- Single-use sachets of **20 ml**
- Box of **48 units**
