

EXAMINATION LUMINAIRE VISIANO 20 LED Lamp

Product description:

Lighting without compromises is essential wherever demands on viewing are highest. Be it in general or dermatological practice, in ENT or gynaecology, in highly sensitive stations such as neonatology or intensive care: the VISIANO 20-2 is a true multi-talent. Due to its unique design, state-of-the-art lighting technology and highest light quality, it provides perfect examination conditions.

- LED technology
- Illuminated field 210 mm
- Precise colour rendering Ra >95, R9 >90
- Colour temperatures (3500K and 4500K) allow individual contrast viewing
- Illumination strength dimmable in 4 stages
- Highest light quality due to diamond optics
- Antimicrobial hygiene function on important lamp components (optional)
- Easy operating unit on head
- Maximum operating radius (head can be rotated about 360°)
- Excellent ergonomics due to spring-balanced aluminium arm system
- Minimum maintenance costs due to LED technology
- Slight thermal radiation in light (reduced drying of tissue)
- Complies with the requirements of standards EN 60601-1 and EN 60601-2-41

Characteristics

- Generalist practice
- Gynecology
- Intensive care
- Dermatology
