

NON-MAGNETIC MOP Mop for MRI floor maintenance

Product description:

Mop

Made of polypropylene, impact-resistant and recyclable plastic with rubber flaps. Light and practical. Must be used in one direction only, following the orientation of the slats (you can also check this from the arrows printed on the frame). The ebpplock system blocks lateral movements of the mop holder and ensures maximum adhesion to vertical surfaces for better cleaning results. This system can be turned on and off by simply pushing up or down its small lever (locking device) with its foot, without using your hands and without bending over. Is also ideal for uneven floors thanks to its flexible slats. Universal screw that allows the use of all types of handles with a diameter from 20 to 24 mm. Washable and autoclavable up to 120° C. Latex-free product

Manche

Fiberglass handle with a length of 145cm

Cloth

ultra-microfiber fabric with tear-off system, with color-coded label

Reference: IRM0199
