

MAGNAWAND - CLEANING KIT FOR MRI AND CT

The MagnaWand mop brush is a non-ferrous cleaning tool specially designed for cleaning / disinfecting MRI and CT machines.

Product description:

The MagnaWand mop brush is a non-ferrous cleaning tool specially designed for cleaning / disinfecting MRI and CT machines. This allows hospitals to clean quickly and easily without wasting time. With the Magnawand, you can disinfect hard-to-reach areas of MRI or CT in seconds. The cleaning pads specially designed for the Magnawand can be used with a disinfectant. Once the CT or MRI scanner has been cleaned, the cleaning pads can be easily removed without having to touch them, which prevents cross-infection.

Do you know that:

- The spread of bacteria has tripled since 1980
- MRI and CT scanners are not systematically cleaned between each patient
- Deadly bacteria can survive on hard surfaces for up to 1 hour.

Contents:

Kit (stick, hook and 25 cleaning pads)

MEDICAL EQUIPMENT, ACCESSORIES AND CONSUMABLES FOR MEDICAL IMAGING.
