

## RELAX & VIEW® WALL AND CEILING

**Designed to flood light into windowless rooms the Relax & View® wall and ceiling panels are ideal for use in Therapy Treatment Rooms, X-ray Departments, MRI Suites and Patient Waiting Areas.**

### Product description:

The transparent images provide a pleasant distraction for patients, reducing the effects of claustrophobia, patient stress and restlessness.

Our LED panels have been developed from technology using 8mm LED sheet which is an acrylic lit panel containing LED's as its light source. This new technology ensures that the light is evenly reflected throughout the entire panel.

The price of each system includes a high quality transparency of any image from our Relax and View Image Collection.

#### Features Include

- Wall mounted in portrait form up to a total of four units
- Single units are wall mounted in a landscape form to display scenic images
- Ceiling mounted units create a feeling of openness and freedom
