

MAGNAWAND - AMAGNETIC CLEANING MOP FOR MRI AND CT

The MagnaWand mop brush is a non-ferrous cleaning tool specially designed for cleaning / disinfecting MRI (up to 7 Tesla) and CT machines.

Product description:

This allows hospitals to clean quickly and easily without wasting time. With the Magnawand, you can disinfect hard-to-reach MRI or CT areas in seconds. The cleaning pads specially designed for the Magnawand can be used with a disinfectant. Once the CT or MRI scanner has been cleaned, the cleaning pads can be easily removed without having to touch them, preventing cross-infection.

Do you know that :

- The spread of bacteria has tripled since 1980.
- MRI and CT scanners should be routinely cleaned after each patient.
- Deadly bacteria can survive on hard surfaces for up to 1 hour.

Included:

- 1 x amagnetic MagnaWand mop

MRI Tesla: 7 Tesla
