

EASYVIEW LME - SYRINGE SHIELDS

Complete range of ergonomic tungsten syringe shields for low and medium energy

Product description:

The Easyview range of syringe shields is a large range compatible with all types of syringes.

Thanks to a smart design, Easyview is an easy-care product which can be easily repaired and maintained. Indeed, one single screw need to be disassembled to change the lead glass.

The range has been designed to facilitate daily injection and preparation practices in nuclear medicine departments. The withdraw of the syringe is very quick and the large viewing window with zoom effect brings a lot of comfort to view graduations.

Last, we chose to made Easyview syringe shields out of tungsten to maximise operator's radiation protection.

Radiation protection:

- Min tungsten thickness: 2 mm
- Lead glass thickness (density 5.2): 8 mm
- Attenuation > 99%

Range compatibility: with all syringes of the market.

Ergonomics: easy grip and extra large viewing window with zoom effect.

Easy maintenance: quick change and simple of glass thanks to removing a single screw.

Characteristics

- From 1 to 10 mL
- Radioprotection : 2 mm tungsten / 8 mm lead glass (5.2 density)

Easyview - Capacity: 1 mL, 2 mL, 2,5 mL, 3 mL, 5 mL, 10 mL

Easyview - Length: 70 mm, 75 mm, 76mm, 50 mm, 53 mm, 59 mm, 69 mm, 57 mm, 61 mm, 64 mm, 73 mm, 83 mm, 85 mm
