

SPÉCULUM COLLIN À USAGE UNIQUE Disposable Collin Speculum

Product description:

Collin type sterile disposable vaginal speculum

- Gynecological examinations
- Vaginal swabs, smear
- Hysterosonography and hysterosalpingography
- IUD insertion
- Colposcopy and biopsies

Collin's speculum is particularly recommended for all procedures requiring good visualization and improved accessibility of the cervix.

It has many advantages, both for the gynecologist or midwife and for the patient.

For the practitioner:

- Improved accessibility to the cervix thanks to its side opening
- Optimal visualization of the vaginal walls and mucosa thanks to its high quality transparent plastic valves
- Easy and quiet handling
- A practical opening
- Perfect valve blocking thanks to quality life
- 3 different sizes to best match the morphology of all patients

For the patient:

- A very soft contact thanks to the rounded and atraumatic edge of the valves
- No thermal shock
- This speculum can be dismantled, in particular for examinations on the prolapse.
