MEDISHARP - SHIELDED BIN FOR NEEDLES 1,5 L - HE

Easy decontamination thanks to design of lead covered with stainless steel.

Product description:

- Optimum radiation protection: pivoting cover to dispose of needles without opening the lid completely
- Practical: pivoting cover handle for easier opening and closing.

This shielded sharp bin for bench top is conceived to receive plastic sharp containers to store used needles, syringes, and vials. It has been designed to ensure optimal biological protection of the operator.

This product exist in Low & Medium Energy and High Energy.

The plastic sharps container is resistant to perforations and has a blocking lid.

A handle helps to open the lid and secures closure.

A revolving trap on the lid avoids the need to open the lid to dispose of the needles.

Characteristics - High Energy

- Overall dimensions: L 240 x D 235 x H 350 mm
- Internal dimensions: L 164 x D 155 x H 215 mm
- Radiation protection: 16 mm lead
- Weight: 49 kg
