PROFILED POSITIONING WEDGE WITH BASE - ULNAR NERVE

Gel wedge for arm positioning

Product description:

The contoured positioning wedge with ulnar nerve base protects and stabilizes the upper extremities during surgery.

Materials
It is made of an amorphous polyurethane gel with a density of 0.99 gr/cm3.

Maintenance and Cleaning
• The gel positioners can be easily cleaned with any cleaning agent and / or disinfectant for the operating room.
• Avoid immersing the gel positioners in the detergent and / or disinfectant for a long time.

Storage and Disposal
• Keep the positioners, if possible, on a level surface.
• Avoid placing heavy or sharp objects on the positioners.
• Keep the gel temperature between -18 and 50 degrees.
• Keep away from sources of light, moisture and heat.
• Dispose of the device in compliance with current regulations on environmental protection and separate waste collection.
