

CARESTREAM TRIMAX TXM+ LASER FILMS
TRIMAX TXM+ Mammography Laser Films 4×125 sheets

Product description:

X-ray film for mammography applications TXM+ 4×125 sheets

Carestream TRIMAX TXM+ X-ray films for mammography applications. These films have a higher maximum optical density for a more detailed rendering, faithfully reproducing shadows with a greater grey level scale. The clarity and sharpness of the images obtained is superior to that of conventional film.

- **Dry laser technology**
- **D-max 4.0**
- **AIQC image quality control**

Carestream trays are developed to be changed directly in daylight **without the risk of fogging the films**. The printer automatically re-seals the tray as soon as the compartment is opened, saving more films. During the changeover, the system automatically detects the model and format of the new tray without the need for additional adjustments.

The trays hold 125 films. They are compatible with TRIMAX TX printers.

TXM+ mammography films are available in two formats:

- 1039700 - 20 x 25 cm,
- 1039718 - 25 x 30 cm.

Size: 20 x 25 cm / 8 x 10", 25 x 30 cm / 10 x 12"
