

## MANUBOX TROLLEY

Mobile trolley for the safe transport of high energy syringe carrier

LEMER PAX

### Product description:

#### WHY CHOOSE MANUBOX TROLLEY

- **Mobility:** no more need to carry heavy loads
- **Working comfort:** ergonomic handle to guide the movement
- **Safety:** thick stainless steel base for optimum stability
- **Hygiene:** made of stainless steel for easy, long-term cleaning

**Manubox is a mobile trolley** for the safe transport of **high-energy shielded cases** and doses of radiopharmaceuticals labelled with 18F, 131I, 68Ga, 13N. It allows for the transport into the preparation laboratory to the injection rooms or cubicles, thus **eliminating the need to carry heavy loads**.

#### Manubox trolley: safety and mobility

**Highly mobile**, with its **5 swivel castors**, Manubox trolley features a **large handle for easy handling**. Covered in a black heat-shrinkable sheath for easy handling, it allows for easy one or two-handed operation. It is equipped with a fixed cavity, made of POM, a robust and easily decontaminable material, adapted to the size of the case used. Thus, Manubox trolley ensures a **good hold and total stability of the carrier** during the entire transport time.

Manubox can be adapted to all models of Lemer Pax and Medisystem carrier on request and further to a feasibility study. It is entirely made of 304L stainless steel for long-lasting resistance, for easy daily maintenance. And as well as for disinfection and decontamination. The tray features **a rim** over its entire surface, similar to a **spill containment tray**, to protect users from possible contamination and leakage.

This large tray with a rim also makes it possible to position and transport the equipment and consumables such as compresses and disinfectants required for the administration of radiopharmaceutical doses.

**Overall dimensions:** L 511 x D 514 x H 942 mm

**Tray dimensions:** L 450 x D 400 mm

**Tray height:** 835 mm

**Component parts:**

- 304L stainless steel structure
- Base with natural POM case cavity
- Black thermo-sleeve handle
- 5 double castors Ø 75 mm

**Weight:** 64 kg

**Compatibility:**

- with Medi HE carrier
- with Crocobox HE carrier on request
- other model according to study
